Couplings and clutches formerly branded as

**LOHMANN +
STOLTERFOHT**

The product portfolio consists of:

Spiroflex ks/kj

Highly elastic shaft couplings for torque of up to 928 kNm.

Pneumaflex ka

Highly elastic clutches for torque of up to 304 kNm.
Pneumatically switchable.

It reliably interrupts or establishes the flow of power between the diesel engine and the other driving components.

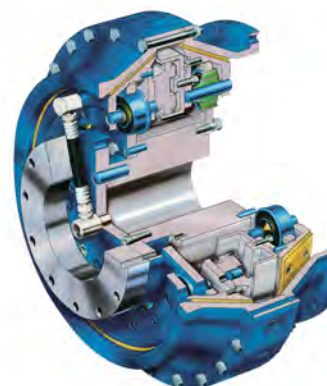

Pneumastar ku

Torsionally stiff clutches for torques of up to 1400 kNm.
Pneumatically switchable.

The Pneumastar clutch is a torsionally stiff double-cone friction clutch. The clutching components consist of two inner and two outer friction cones of which the inner ones.

We also supply slip

Cuplings and clutches, formerly branded as Lohmann + Stolterfoht, for marine drives are approved by all the relevant classification societies. Features and benefits: higher transmissible torques, improved technical properties, successfully tested, ideal marine coupling.
